

Acumera: The Safest Choice

FOR CONNECTIVITY, VISIBILITY, SECURITY & COMPLIANCE

Acumera:

- Is a Verifone and Gilbarco certified provider
- Provides 24x7x365 US-based network support for maximum uptime
- Is fully PCI compliant and can provide an Attestation of Compliance (AOC)
- Is listed on the Mastercard and Visa PCI compliant service provider registries
- Delivers a flexible solution that grows with future technology

Why choose
Acumera as
your MNSP?

Network Security and Connectivity

Our C-Store Connections all-in-one solution provides:

- Secure POS and payment gateway connectivity
- A managed POS firewall that segments payment systems from the rest of your network
- A perimeter firewall that protects your entire network
- WAN failover enabled for automatic backup network connectivity
- Cellular failover, including a modem, data plan and flexible carrier options
- Segmented WiFi that can be positioned anywhere in the store, rather than incorporated into a security appliance

We give you apps and tools to monitor and manage your network:

- A cloud-based dashboard for visibility of network-connected devices at all locations
- Secure remote POS vendor access that meets PCI DSS Requirements 12.3.8 and 12.3.9
- Cloud-based apps and tools for PCI compliance, management, analytics, loyalty programs, and more
- A tank monitoring app to manage fuel ordering and inventory
- Virtual Private Network (VPN) setup to connect headquarters securely to distributed locations

Visibility &
Apps for
Connected
Devices

Management, Compliance & Analytics Tools

Acumera provides you:

- Internal and external vulnerability scanning
- Logging and storage of network traffic data
- An intrusion detection system (IDS) for detection, monitoring and response
- Web content filtering for spam and malware control
- Clear identification of non-PCI payment application devices in the Cardholder Data Environment (CDE)
