

Why Should You Choose Acumera?

Acumera is a registered trademark and AcuVigil, AcuLink, BranchSDO and the logo are trademarks of Acumera, Inc. All trademarks, logos, and brand names are the property of their respective owners.

What Does Acumera Offer?

- **Certified Gilbarco and Verifone Managed Network Provider (MNSP)** - Focuses on safeguarding your network through robust security and compliance
- **AcuVigil™ platform**- Focuses on Advanced Network Services: reduce costs, eliminate complexity, and gain visibility through the AcuVigil™ platform - This is a single PCI compliant dashboard that can remotely access on-premise technology, therefore, eliminating the constant need for monitoring.
- **Acumera Consolidated Edge™ (ACE) Solution** - Focuses on seamless management at scale: innovate with the Acumera's Reliant Platform, which makes deploying and scaling new and legacy applications easy, while reducing latency, lost connectivity and cost. It also moves applications to the cloud to deliver interactive customer experiences with reliability and security.
- **US-Based Customer Support Center Operated 24/7**
- **Level One PCI-Certified Provider** - Focus on protecting cardholder data and simplify compliance for technicians and sites
 - **PCI Help Desk** - And, guess what? NO ONE ELSE OFFERS THIS.

If you're looking for questions to ask any potential managed network security provider:

Can they give me full visibility into my network—at every site?

Do they specialize in retail, QSR, fuel, and unmanned environments—or just dabble in them?

Do they handle security as part of their service—like managed firewalls and segmentation?

Can they provide an AOC (Attestation of Compliance) and Roles and Responsibilities matrix to simplify my PCI-DSS reporting?

Acumera checks all those boxes—and more.

Why should you upgrade your SZR to an Acumera MNSP solution?

- As an approved MNSP, Acumera:
 - Can convert an existing Gilbarco secure zone router into a payment gateway
 - Provides AcuLink™ remote access to quickly and securely connect to the Gilbarco help desk and other critical endpoints (like the Passport POS, DVRs, and ATGS) with a simple one-click activation and auto disconnect
 - Gives stores the option to add tank gauge visibility and monitoring for virtually any ATG
 - Maintains a [US-based Network Operations Center \(NOC\)](#) that provides proactive, 24/7 network support
 - Delivers unmatched visibility of networks through the intuitive AcuVigil™ cloud-based dashboard and apps
 - Enables stores to utilize its app-based architecture to easily communicate with and receive data from third-party loyalty providers
